Modern Lower Face  Rejuvenation . . .

Minimally Invasive or Open Surgical Approach. The Ribbon deploys quickly and easily in a neck lift, a jowl lift, or as part of a full face lift, via a tiny incision or a fully open procedure.

Adjustable Lift Vector and Degree of Lift. Choose your lift vector and degree of lift to suit the patient's needs and procedure. Vary vector and degree of lift instantaneously for dramatic intraoperative results and beautiful cervicomental definition.

Secure and Adjustable. The Ribbon’s patented multipoint design greatly surpasses the fixation power of multiple traditional suture loops but can be easily repositioned for optimal correction.

Long or Short Device. You customize the Ribbon to the procedure and the patient’s anatomy. Trim the fixation area or the smooth-leash length to create the best dimension for an ideal surgical outcome.

Results and Patient Satisfaction. Unlike any other traditional method, the ENDOTINE Ribbon’s combination of secure fixation and bioabsorbability lets nature’s healing process proceed without residual fixation artifacts to detract from the results, leading to greater patient satisfaction!

The ENDOTINE Ribbon-lift Procedure

- Short learning curve
- No special instruments
- Straightforward placement

Sculpt the Jaw Line with Incomparable Ease and Predictability

Finally, a device and procedure that delivers the lasting results and patient satisfaction you need. Using patented multipoint fixation technology, the bioabsorbable ENDOTINE Ribbon™ implant offers unprecedented flexibility, with a variety of surgical approaches, lift vectors, degrees of lift, and ease of use.

**SIX EASY STEPS:**

1. **INCISE**
   Make the appropriate incision.

2. **DISSECT**
   Perform a complete release of the surgical plane.

3. **DEPLOY**
   Deploy the Ribbon from its protective cover.

4. **ENGAGE**
   Engage the tissue and elevate to the desired position.

5. **SECURE**
   Secure the Ribbon with suture.

6. **CLOSE**
   Close the incision and apply a compression dressing as appropriate.

**Ribbon Lift Procedure for the Jowl**

For optimal results, device placement should follow full release of the surgical plane.

**Ribbon Lift Procedure for the Neck**

Please refer to ENDOTINE Ribbon Instructions for Use for complete procedural description.

---

**Revolutionary Evolution**—Improve your fixation methodology and flexibility without changing your overall surgical approach.

**Self-Contained**—The ENDOTINE Ribbon's protective cover doubles as its insertion device.

**Simple and Quick**—Using a minimally invasive approach, perform an entire procedure in minutes per side under local anesthesia.
Lower Face and Neck Lifts That Last…
Sculpt the Jaw Line with Incomparable Ease and Predictability
