

SUPERIOR PRODUCTS FOR FACIAL CONTOURING

*Aesthetic & Accurate Solutions
for Today's Surgeons*

Implantech[®]
Superior Patient Aesthetics

WELCOME

Implantech is the recognized leader in manufacturing innovative facial implants for the aesthetic and reconstructive surgical marketplace. We have a complete line of sterile solid silicone and ePTFE-coated facial implants that have been designed by respected leaders of aesthetic plastic surgery.

We offer over 150 sizes and shapes of silicone and Composite™ (silicone coated with ePTFE) facial implants, in stock and ready to ship. In addition to our current products, we also offer 3D Accuscan®, a unique process using the patient’s CT scan to develop 3D Accuscan Patient-Specific® implants that correct bony defects and soft-tissue deficiencies – with no guesswork.

Implantech is proud to maintain FDA, ISO-13485 and CE certifications. Compliance with these U.S. and international regulations is your assurance that every one of our implants is manufactured to the highest quality standards.

Our ongoing goal at Implantech is to continue to provide the high-quality products and service you’ve come to expect. We sincerely appreciate your continued support and trust.

There’s no reason to operate with anyone else.

Conform™ Extended Anatomical Chin

Evolution of all of the technology and design of our previous chin implants. Incorporates the patented Conform™ grid pattern to allow for easier implant insertion and to closely conform to underlying bony structure.

Cat. No.	Size	A	B	C	D	E	F
CEAG-S	Small	5.0	1.0	0.43	8.0	3.5	0.2
CEAG-M	Medium	5.6	1.2	0.50	10.0	4.2	0.3

TEAG-SIZ-NS	Sizers	Complete Set					

Dimensions in centimeters

CHIN AND MANDIBULAR IMPLANTS

Flowers Mandibular Glove®

Posterior implant surface matches the anatomical variations of the anterior surface of the mandible. Provides anterior chin augmentation while slightly tilting the chin mound vertically upward. Blends in laterally, with no appreciable lateral augmentation.

Cat. No.	Size	A	B	C	D	E	F
FMG-VXS	X-Small	6.0	1.75	0.50	9.0	3.7	0.2
FMG-VS	Small	6.0	1.75	0.60	9.0	3.8	0.3

FMG-VXL	X-Large	6.3	1.75	1.20	10.8	5.4	0.5
FMG-VSIZ-NS	Sizes	Complete Set					

Dimensions in centimeters

Vertical Lengthening Chin

Designed by Barry L Eppley, MD, DMD

Designed to address a three-dimensional chin deficiency. Implant secures to the lower edge of the anterior jawline to provide both a downward 45-degree augmentation and a horizontal projection. Creates a more elongated face and triangular jawline-chin shape.

Cat. No.	Size	A	B	C	D	E	F	G
VLG-S	Small	6.5	1.4	0.79	9.0	3.6	0.52	0.55
VLG-M	Medium	7.3	1.6	1.0	10.5	4.7	0.50	0.60
VLG-L	Large	7.8	1.8	1.2	12.0	5.2	0.60	0.70
VLG-SIZ-NS	Sizes	Complete Set						

Dimensions in centimeters

Glasgold Wafer™

Provides 2mm additional anterior projection for Extended Anatomical Chin, Terino Extended Anatomical™ Chin (GLE) and Mittelman Pre Jowl Chin™ (GLM).

Cat. No.	Size	A	B	C
GLE-2	2mm	3.6	1.1	0.2
GLM-2	2mm	3.6	1.1	0.2

Dimensions in centimeters

Mittelman Pre Jowl®

Provides augmentation in pre-jowl sulcus with no additional anterior chin augmentation.

Cat. No.	Size	A	B	C	D	E	F
MPJ-S	Small	6.0	1.0	0.10	10.5	4.2	0.3
MPJ-M	Medium	6.0	1.0	0.10	11.0	4.3	0.4

CSC-XL	X-Large	4.0	1.5	0.70	4.5
CSC-SIZ-NS	Sizers	Complete Set			

Dimensions in centimeters

Conform™ Mandibular Angle

Compared to the Lateral Mandibular Angle, the implant's shortened ramus, longer mandibular dimensions with slightly more lateral projection puts more emphasis on the angle prominence and mandibular definition. Patented Conform™ grid pattern readily adapts to the gonial angle. Specify Catalog No. for "Left (L)" or "Right (R)". Single-packed (not in pairs). Save by purchasing a pair.

Cat. No.	A	B	C	D	E	F	G

CMA-SIZ-NS	Sizers	Complete Set					

Dimensions in centimeters

Widening Mandibular Angle

Designed by Barry L Eppley, MD, DMD

Features less lateral projection than the Conform™ Mandibular Angle and a more defined angle prominence. Extended mandible and shortened ramus edges help enable a more ideal fit to jaw angle. Specify Catalog No. for "Left (L)" or "Right (R)." Single-packed (not in pairs). Save by purchasing a pair.

Cat. No.	A	B	C

WMA-10R	3.6	1.0	4.6
WMA-SIZ-NS	Sizers	Complete Set	

Dimensions in centimeters

Vertical Mandibular Angle

Designed by Barry L Eppley, MD, DMD

A new innovative jaw implant design that creates a distinct jaw angle shape below the patient's natural jaw line. Vertically lengthens the short ramus to more clearly define the jaw angle. This also results in a more aesthetically pleasing widened lower face. Specify Catalog No. for "Left (L)" or "Right (R)." Single-packed (not in pairs). Save by purchasing a pair.

Composite™ Facial Implants

Consisting of flexible silicone fully encased in a .3mm layer expanded polytetrafluoroethylene (ePTFE), our Composite Facial Implants readily adapt to underlying bone and tissue. ePTFE has been shown to allow tissue attachment and provide further implant stabilization.

ePTFE-Coated Binder Submalar® II

Elevates and repositions the overlying midfacial soft tissue in an anterior and superior position for a more youthful appearance. Adds lower midfacial fullness while softening the nasalabial fold. It is designed to fit more inferiorly into the submalar space to provide natural augmentation in patients with high cheekbones and sunken cheeks. Sold in pairs.

Temporal Shell Implant

Designed by Barry L Eppley, MD, DMD

An ideal, permanent solution for temporal hollowing due to genetics or trauma. Soft and flexible, the silicone Temporal Shell provides soft-tissue volume (muscle enhancement) for an aesthetically pleasing appearance. Specify Catalog No. for "Left (L)" or "Right (R)." Single-packed (not in pairs). Save by purchasing a pair.

Cat. No.	A	B	C
TS-04L	4.7	3.9	0.4

Dimensions in centimeters

Temporal Shell - Extended

Designed by Barry L Eppley, MD, DMD

The extended temporal implant provides permanent augmentation to both upper and lower temporal regions. From the top of the zygomatic arch to the anterior temporal line of the forehead, it provides correction of temporal hollowing through augmentation of the full vertical length of the muscle. Its tapering design allows the implant to blend smoothly into the temporal region without visible edges. Specify Catalog No. for "Left (L)" or "Right (R)." Single-packed (not in pairs). Save by purchasing a pair.

Cat. No.	A	B	C

Dimensions in centimeters

Silicone Block - Rectangular (Non-Sterile)

Carvable into individual implant shapes. Available in three hardnesses (or durometers).

Cat. No.		A	B	C
BLK-10-NS	Soft	12.0	7.0	1.5
BLK-20-NS	Medium	12.0	7.0	1.5
BLK-40-NS	Firm	12.0	7.0	1.5

Dimensions in centimeters

Periosteal Elevators

Elevators are handcrafted in Germany from surgical-grade stainless steel, and more easily create an optimal pocket for Implantech facial implants. Save by purchasing all three sizes.

Cat. No.	Width	Length
ELE-04	0.4 cm	7 in.
ELE-06	0.6 cm	7 in.
ELE-10	1.0 cm	7 in.

SE-100 Smoke Aspiration Tip

Simple and effective. Removes smoke, particles and body fluids. Universally adaptable to all electrocautery pencils. Clear for improved visibility. Can be cut to any length. Sterile packaged and disposable.

Cat. No.	Description
SE-100-10	Box of 10
SE-100-25	Box of 25

Your resource for patient-specific implants

Although Implantech offers many standard implants, there are times when the only solution is a patient-specific product. Choose from our precision 3D Accuscan Patient-Specific® implants, or do-it-yourself moulage kits.

3D Accuscan Patient-Specific® Implants

With 3D Accuscan®, you now have the ability to quickly and easily reconstruct most bony defects and soft tissue deficiencies. Simply supply us with the appropriate CT scan and we will schedule a web meeting during which we will assist you in designing an implant specifically for your patient. Additionally we can produce a 3D model of your patient's anatomy as a consultation or surgical aid.

Implantech Moulage Kits

Each kit contains all necessary items for you to fabricate a moulage of the patient's defect. We then faithfully recreate an implantable-grade silicone implant from your moulage. Complete instructions are included.

Cat. No.	Plaster Moulage Kit
IMK-1	Contains enough material to fabricate a cellulose plaster moulage approximately 15cm x 15cm in area, and 2cm in thickness.

Cat. No.	Silicone Moulage Kit
IMK-2	Contains enough material to fabricate a silicone moulage approximately 14cm x 18cm in area, and 1.5cm in thickness.

Your resource for body contouring, compression healing and scars

Body Contouring

Gluteal Implants - ContourFlex™ gluteal implants result in natural looks and comfort. Supple and flexible, they can be rolled to insert into smaller incisions.

Pectoral Implants - PowerFlex™ implants provide definition or natural-looking muscle for your male patient's upper torso.

Calf Implants - ContourFlex™ calf implants can help your patients achieve the aesthetic fullness they desire in their lower legs.

WE ALSO OFFER SILICONE CARVING BLOCKS, TUBING AND SHEETING.

Gelzone® Wrap

Made of stretchable, fabric-covered silicone gel, the patented GELZONE® Wrap is the only choice that combines compression healing, musculoskeletal support and scar management. The wrap stays exactly where it's put while providing ideal uniform compression. Excellent for flattening and fading keloids and hypertrophic scars.

Cimeosil® Scar Management

Cimeosil® gels and gel sheeting are silicone-based products designed to improve the appearance of scars, particularly those that are raised, red and sometimes itchy and/or painful. Cimeosil is an excellent treatment for scars occurring from accidents, heart surgery, cesarean sections, abdominoplasty and breast reconstruction. Sheeting is self-adhering and comes in handy shapes and sizes.
