

## EMEA Virtual Course – Breast Augmentation Fundamentals

### Content of Professional Education Offering

#### FACULTY

Prof. Tunc Tiryaki (UK)

#### CLINICAL SOLUTION

This course focuses on fundamentals of breast aesthetic surgery and consists of didactic sessions and pre-recorded surgeries, to provide an interactive training on achieving excellent aesthetic outcomes through primary breast augmentation, including mastopexy-augmentation.

#### TECHNICAL SOLUTION

- MENTOR® CPG™, MENTOR® MemoryGel® and MENTOR® MemoryGel® Xtra Breast Implants

### Learning Objective

- Understand and apply patient measurements and decision-making in implant selection
- Advance surgical skills in primary breast augmentation, including simplified mastopexy-augmentation
- Upgrade communication to patients regarding breast implant options and safety
- Refine understanding of post-op care and follow-up

### Target Group – Early Learner

The ideal profile for the course participants is plastic surgeons with up to 3 years in practice who wish to advance their understanding of breast augmentation fundamentals: patient measurements, implant options, surgical technique and patient communication in primary breast augmentation cases.
