

EMEA Virtual Course - Postmastectomy Breast Reconstruction - MDT Approach

Content of Professional Education Offering

FACULTY

Prof. Pier Camillo Parodi (Italy), the Udine Breast Unit

CLINICAL SOLUTION

This online course has been designed for reconstructive surgeons, with four or more years of experience, who wish to advance their confidence performing advanced breast reconstruction procedures, mainly focusing on implant-based breast reconstruction.

TECHNICAL SOLUTION

- MENTOR® CPG™ Breast implants, MENTOR® CPX™ Breast Tissue Expander

Learning Objective

- Help improve decision making in MDT: how to decide an optimal surgical approach
- Help advance surgeon's confidence performing DTI and 2-stage reconstruction
- Discuss the use of biological membranes (ADM) and nets in breast reconstructive surgery

Target Group – Intermediate

Reconstructive surgeons with at least 4 years in practice, who wish to advance their understanding and skills in direct-to-implant reconstruction as well as decision-making in a multidisciplinary team.

BREAST RECONSTRUCTION
