## EMEA Virtual Course – Secondary Surgery

### Content of Professional Education Offering

#### FACULTY

Dr. Per Heden (Sweden)

#### CLINICAL SOLUTION

This course will focus on secondary surgery and will offer a detailed discussion on how deal with the capsule. The course consists of a combination of pre-recorded surgery and interactive lectures to promote in-depth learning on the topic.

The participants are also encouraged to bring 1-2 slides describing their own case on which they would like to receive expert advice.

#### TECHNICAL SOLUTION

- MENTOR® CPG™, MENTOR® MemoryGel® and MENTOR® MemoryGel® Xtra Breast Implants

### Learning Objective

- Advance understanding of patient measurements in secondary surgery
- Improve patient communication about different surgical options
- Upgrade confidence performing different surgical approaches in secondary surgery with specific focus on how to deal with the capsule

### Target Group – Intermediate/ Expert

The ideal profile for the course participants is experienced plastic surgeons with at least 5 years in independent private practice who wish to refine patient measurements and different surgical options in cases of ptotic breast.
