

Virtual Coaching: Expert Connect

Content of ProfEd Offering

Faculty

Dr. Per Heden, Sweden, Dr. Paul Harris, UK, Prof. Yoav Barnea, Israel, Prof. Tunc Tiryaki, UK

Clinical Solution

Provide personalized learning opportunities to expert surgeons and private clinics, as they strive to improve surgical skills, decision-making and patient consultation practices in aesthetic procedures. The focus is on complex cases (e.g. secondary surgery, ptotic breast, mastopexy augmentation, tuberous breast or other topics chosen by the participants. Each session request needs to be sent to PEM [at least 9 weeks in advance](#).

Technical Solution

- MENTOR® CPG™, MemoryGel™ and MemoryGel™ XTRA Breast Implants

Learning Objective

- Review surgical procedures for complex cases and share tips and tricks to optimize results
- Discuss best practices in patient consultation, measurements and surgical planning
- Discuss surgical tips & tricks to help improve surgical skills

Target Group – Expert Learner

The ideal profile for the course participants is an expert surgeon/ aspiring KOL or a surgical team from a clinic, motivated to discuss their specific learning needs to improve patient results and satisfaction for the long term.
